

Mapped CMC + identical cleanup; blue: accepted, red: rejected
Stress and waiting time use the live bicrystal law

Preserved unequal 0.70 trajectory: new metrology only
No events or strain were synthesized; LEFT/RIGHT local curves overlap

1000 native steps immediately after cleanup
Early relaxation slopes must not be extrapolated to a root event

Guarded shortlist continuations; corrected bicrystal coordinate indexing
LEFT and RIGHT coincide; no stochastic events enabled
